

Imagine...

...being able to guarantee safe, dangerous science demonstrations

... no more disruption caused by specialist staff absences

...sharing best practice between schools

...creating your own multimedia content and publishing it globally

Welcome to **schools-video** the most advanced video recording and distribution system for schools. With **schools-video** and the power of today's computers, networks and the internet you can revolutionise the way your pupils to interact with video based information and dramatically expand the range of information available to them. **schools-video** also provides you with solutions to a whole host of logistical problems.

Safety

- Students safe from dangerous science demos by using video link
- Pre-record these science demos
- Student access to previously unavailable demos

Best practice

- Share content across departments
- Share across schools, even internationally
- Share cost of content creation with other schools
- Provide access for excluded children

Real time or pre-recorded material

- Specialist teacher need not be present
- Easier for supply teachers
- Allows wider choice of content

Improve communications between schools

- Video conferencing via the web linking to other schools regardless of location

Simple production facility

- Allows you to produce fully web based multi-media teaching material
- No technical knowledge needed

Security

- Secure monitoring of school facilities via any video camera

schools-video features include :

- Centralised library facility for simple sharing of content.
- Revision control to ensure all users have access to latest versions.
- Internet and/or intranet video conferencing.
- Little training needed to use effectively.
- Easy to use.
- Integrates with existing 'administration' system for simple and low cost set up.
- Free support 0800 number available 24/7.
- Advance management reporting.
